Freelancer

As a multi-skilled broadcast specialist I have earned a reputation throughout the world as an experienced operator of cameras of all types, from high end broadcast and production cameras, miniature and full sized remote systems, drones through to POV and underwater equipment.

In addition I have extensive knowledge in location sound recording, lighting and on-set gripping.

Based in Port Douglas Far North Queensland, I have been called on to work in more than 40 countries around the world during a career spanning almost 30 years in the film/broadcasting industry.

From wildlife documentaries to major world sporting events, popular TV shows to corporate films and advertising my roles have included but not limited to DP/camera operator, camera assisting, technical and rigging engineer, sound recordist, lighting, gripping and producing/directing.

I personally own a wide range of equipment that includes a JimmyJib, Lightweight steadicam, RED Helium 8K camera, lenses, lighting and sound recording gear and I am in partnership in a gripping/lighting truck that is based in Cairns.
